

The Sustainable Building San Francisco program is jointly offered by Lifelong Education Institute™ and Unified Systems.

**Lifelong Education Institute™** is an educational institution dedicated to offering higher education and intercultural exchange through programs that cultivate lifelong learning, foster creativity and innovation, and instill an authentic appreciation for diversity and cultural differences.

**Unified Systems** is a sustainable building consulting firm for projects that range from new and existing buildings to neighborhood developments; Unified Systems is dedicated to projects that bring high performance and sustainability to the built environment.

# Sustainable Building San Francisco

## When

In order to accommodate busy professionals and international participants, the Sustainable Building San Francisco program is a 5-day course that is offered multiple times throughout the year. Alternate dates can be arranged for institutions and groups of 15 or more.

## Location

All classes and building tours are hosted in San Francisco, California. Innovative technologies will be taught by experts at the Pacific Energy Center in downtown San Francisco and tours of world-renowned buildings will be hosted throughout San Francisco Bay Area.

## Travel

International participants, at their convenience, will have the chance to create a customized additional tourism package that includes the option to travel anywhere in the U.S. before or after the program.
